Counselors are available to assist parents and students with course selections and career planning. Parents may arrange to meet with the counselor by calling the school's guidance department.

COURSE DESCRIPTION

Algebra I Honors is a mathematics course for students who exhibit high mathematical ability and achievement. The course is designed to prepare students for Scientific, Technology, Engineering and Mathematics (STEM) fields. The course focuses on the development of problem-solving skills and the acquisition of mathematical vocabulary and symbols. The active engagement of students along with the use of manipulatives and technology, such as the Desmos calculator and Chromebooks, will allow students to develop an understanding of the mathematical principles they are learning. Facility in the use of technology will not be a substitute for students' understanding of quantitative concepts and proficiency in computations. Topics include variables and expressions; solving equations and inequalities; linear, quadratic, and exponential functions; graphing and writing linear equations; systems of equations and inequalities; polynomials; factoring; and rational expressions. Students in Algebra I Honors will focus on the abstract and theoretical explorations of the concepts along with their applications in a STEM environment. Students will engage in mathematical discourse with the teacher and other students. Students enrolled in this course will take the Algebra I End-of-Course test. Specific dates for the administration of the SOL test will be announced by the school. **Students cannot receive credit for both Algebra I Honors and Algebra I (MA 3130).**
